Day 62 | 12.0 km (7.4 mi)

What to expect

- **Parking:** Roadside parking on the shoulder of Cole's Side Rd, where it turns into a logging road. Don't block the logging road. In April 2026 the BTC reported Coles Road closed to traffic because of flooding, so in wet seasons check conditions before you drive up.
- **Kemble trail network:** This web of side trails opened in 2019 across 316 acres of Bruce Trail Conservancy land. A BTC club hike rated it moderate, with some hills, poor footing and muddy sections, crevices, and mature cedar and hardwood forest. A guidebook rates the loops moderate to strenuous.
- **Cliff edge and crevices:** Part of the main Bruce Trail here follows a narrow ledge along the cliff face, and a guidebook warns that many crevices lie above the cliff edge. Keep Zappy on a short leash and close to you.
- **Cedar Point Side Trail:** A short loop to a lookout over a marsh and an area of shallow open water.
- **Kemble Wetland Side Trail:** It leads to a clearing at the edge of a large wetland, through meadow, hawthorn thicket and mature hardwood forest. Watch for a big fallen tree with a hole cut through it. Club hikers skip this trail when it's too wet.
- **Mystery Cabin and Coles side trails:** The Mystery Cabin route passes the ruins of a small cabin overlooking a view. We didn't find descriptions of the MapleCross Ridge or Birch Camp side trails.
- **Length:** At 12.5 km this is a long day. The many short loops add up, so bring water and snacks for you and Zappy.

Distances and junctions are computed from the Bruce Trail Conservancy's trail data (Bruce County GIS). Left/right is calculated from the trail geometry. Use it as a guide, follow the blazes, and check the Conservancy's trail-change notices before you go. Dogs must be leashed everywhere on the Bruce Trail. Trail descriptions draw on Bruce Trail Conservancy trail notices and hike listings and a published Kemble Rock guidebook chapter.
